THE NEW BMW X1.

FOR A LIFE FULL OF POSSIBILITIES.

The new BMW X1 meets each new challenge with equanimity. It's outside has a striking front end with the BMW signature kidney grille whereas the inside provides the 40:20:40 split-folding rear seat and a double luggage compartment floor in the back to offer all the space you need. The dynamic cockpit is oriented around the driver, and perfectly designed to optimise the pure driving pleasure of the new BMW X1.

Find out for yourself just how far you can go with this perfect synergy of dynamism, agility and versatility – in the new BMW X1.

BMW EFFICIENT DYNAMICS.

EfficientDynamics is BMW's award-winning programme of technologies designed to reduce CO₂ emissions and improve fuel economy, without compromising on performance or driving dynamics. These technologies are standard on every new BMW and could lower your fuel and tax costs, as well as ensure a lower benefit in kind tax rating for company car drivers. You can find out more about the benefits of BMW EfficientDynamics, as well as compare your own vehicle against any BMW X1 model at www.bmw.co.uk/EfficientDynamics

- Seat heating, front
- Sport seats

OPTIONAL EQUIPMENT HIGHLIGHTS.

TECHNOLOGY PACKAGE.

A tailored combination of advanced technologies that provide superior comfort, convenience and practicality.

- Reversing camera provides additional support in tight manoeuvres by displaying a clear view of what is happening at the rear
- Comfort Access with smart-opener allows you to lock and unlock your BMW without having to use the key or even open the tailgate with a kick of your foot
- Loudspeaker system – harmon/kardon provides a concert experience in the comfort of your car

See page 10

BMW NAVIGATION PLUS PACKAGE.

BMW Navigation Plus package combines BMW Navigation Plus with a number of BMW ConnectedDrive functions, which provide the driver with a wide range of information, entertainment and service features while on the road. These include BMW Online Services, which provides access to current, localised information such as weather, news and office functions. Also included is Real Time Traffic Information, Full colour Head-up Display, Information Plus and Remote Services.

See page 10

DRIVER COMFORT PACKAGE.

Enables a more relaxed driving experience in all traffic conditions and manoeuvres.

- Audio warning signal of proximity of objects to the front and rear of the car door handles.
- Exterior and interior lighting using LED technology for extra convenience and interior ambience.
- Cruise control with braking function allows relaxed and comfortable driving

See page 10

DRIVING ASSISTANT.

A range of camera-based driver assistance systems that enhance safety and reduce the risk of potential collisions, at both high and low speeds. Some of the advanced systems included in this option are:

- Lane Departure Warning detects lane markings and alerts the driver with a vibration through the steering wheel should the vehicle unintentionally deviates from the lane of travel.
- Forward Collision Warning monitors vehicles ahead and warns the driver by an optical and acoustic alert if their approach could escalate into a rear-end collision, and engages brakes for rapid reaction to potential collisions at higher speeds.

See page 11

VED rates

VED rates for brand new cars are determined by their CO₂ emissions figure.
First year VED applies to the first year of ownership. Annual VED rates apply thereafter.
The new BMW X1 models fall into one of the four categories listed below:

CO ₂ emissions (g/km)	Band C 111-120	Band D 121-130	Band E 131-140	Band F 141-150
First year VED	£0	£0	£130	£145
Annual VED (second year onwards)	£30	£110	£130	£145

On the road price

The recommended on the road price includes:

Delivery and BMW Emergency Service	£700
Number plates	£25
Vehicle first registration fee	£55
First year Vehicle Excise Duty	See left

441	Smoker's package			Z0J	Technology package
				ZNQ	BMW Navigation Plus package

BMW CONNECTED DRIVE SERVICES.

1. General information

BMW (UK) Limited of Summit ONE, Summit Avenue, Farnborough, Hampshire, GU14 0FB (hereafter referred to as “BMW”) provides the customer with vehicle-specific information and support services under the name “BMW ConnectedDrive” (hereinafter referred to as “Services”). Except where the following description of the individual Services explicitly states otherwise, BMW does not collect, store or process customer data for the Services listed here. For the provision of Services for which the collection, storage and processing of personal data is necessary, the customer shall be informed in advance in order to obtain his/her consent. Services are provided by means of a SIM card installed in the vehicle. Call and data-connection costs are included in the price of the Services. Insofar as it is necessary for the substantive organisation and utilisation of the Services BMW collects, stores and processes vehicle-related data within the legal stipulations.

2. BMW ConnectedDrive basic Services

The BMW ConnectedDrive basic Services “TeleServices” (6AE) and “BMW Emergency Call” (6AC) have already been activated at the point of vehicle transfer.

a. TeleServices (6AE)

The “TeleServices” Service ensures the mobility of the customer. If required or when triggered or commissioned by the customer, the vehicle's technical data (e.g. service information concerning wear parts, vehicle-status information such as check-control notifications, battery-charge status, data for identifying and locating the vehicle in the event of a breakdown) shall be transferred to BMW. In the event that a service is required, these items of data shall be forwarded to the responsible service partner, BMW Mobile Care or respective service providers for the purposes of making contact and arranging an appointment, where they shall be retained until all procedures have been properly completed. Beyond this, no data shall be forwarded to third parties. On occasion technical data shall be transferred from the vehicle to BMW where it shall be evaluated to aid the further development of BMW products. This is known as the “Teleservice Report”. This data is exclusively technical, vehicle-related data. Other data such as positioning data shall not be transferred as part of the “Teleservice Report”. The “TeleService Battery Guard” continuously monitors the battery-charge status of the vehicle. If the battery-charge status falls below a fixed value, the responsible service partner will be informed. The responsible service partner will then contact the customer if necessary to arrange a service appointment. By registering in the BMW ConnectedDrive Customer Portal, the customer can also be informed about a critical battery status by SMS message or email, for example if the parking lights, side lights or hazards are left on.

b. BMW Emergency Call (6AC)

The vehicle's identification and location is required for the use of the “BMW Emergency Call”, and it is also necessary to transmit the information required to provide assistance to the respective emergency-service centre. The user's request and the data required may be transmitted to service providers commissioned by BMW to provide the Service – in that case, these items of data shall only be used to help provide the Service and shall be retained until all procedures have been properly completed. Beyond this, no data shall be forwarded to third parties.

3. BMW Online Services (6AK)

The “BMW Online” (6AK) Service is activated for 36 months after first registration. The customer can extend the Service for an additional charge beyond the initial free-of-charge period via the BMW ConnectedDrive Customer Portal.

The vehicle's identification is required for the use of the Service and it shall also be necessary to process the information required to provide assistance. The data shall then be deleted. When Points of Interest queries are used, the customer request may be transmitted to service providers commissioned by BMW to provide the Service – in that case, these items of data shall only be used to help provide the Service and shall be retained until all procedures have been properly completed. The data shall then be deleted. Beyond this, no data shall be forwarded to third parties.

4. Information Plus (6AN)

The “Information Plus” (6AN) Service is activated for 36 months after first registration. The customer can extend the Service for an additional charge beyond the initial free-of-charge period via the BMW ConnectedDrive Customer Portal.

To use the Service, the customer is connected to the BMW call centre at the push of a button using the integrated telephone unit. In this way, data concerning the vehicle's identification, location and – if route guidance is activated – the selected route may be transmitted to the service providers commissioned by BMW to provide the Service – in that case, this data shall only be used to help process the provision of the Service and shall be retained until all procedures have been properly completed. The data shall then be deleted. Beyond this, no data shall be forwarded to third parties.

5. Real Time Traffic Information (6AM)

The “Real Time Traffic Information” (6AM) Service is activated for 36 months after first registration. The customer can extend the Service for an additional charge beyond the initial free-of-charge period via the BMW ConnectedDrive Customer Portal.

The traffic information required for the Service is calculated by a variety of means including using what is known as Floating Car Data. In this sense, every ConnectedDrive-capable BMW functions as a “mobile traffic reporter” (Floating Car). The individual position and sensor data of the vehicle calculated during the trip is transferred – completely anonymously – to BMW and a service provider together with up-to-date time information.

6. Internet (6AR)

The “Internet” (6AR) Service runs for a period of one year after the vehicle's first registration. The customer can extend the Service for an additional charge beyond the initial free-of-charge period via the BMW ConnectedDrive Customer Portal.

7. Remote Services (6AP)

Use of the “Remote Services” (6AP) either upon request to BMW Customer Support or via the “My BMW Remote” smart-phone application requires registration in the BMW ConnectedDrive Customer Portal.

8. Availability of the Service

The complete range of Services is only available for customers whose vehicles are approved in United Kingdom, and only within United Kingdom.

“BMW Emergency Call” (6AC) is available to customers in United Kingdom, Germany, Austria, Italy, France, and the Netherlands. “TeleServices” (6AE), “Information Plus” (6AN), “Remote Services” (6AP) and “BMW Online” (6AK) can be accessed on any mobile communication network in Europe. When used abroad, the range and characteristics of the service may vary from the range and characteristics described above and may vary from country to country. “Real Time Traffic Information” (6AM) is available in United Kingdom, Germany, Italy and France. The “Internet” (6AR) service is only available in United Kingdom.

9. Deactivation

The customer may have the BMW ConnectedDrive basic Services “TeleServices” (6AE) and “BMW Emergency Call” (6AC) deactivated at any time at an authorised BMW Retailer, a regional BMW branch or an authorised BMW workshop. Deactivation of this Service will also deactivate the SIM card installed in the vehicle. This results in the Emergency Call in the vehicle also not functioning. The other Services can also be deactivated by the customer (from November 2013) via the BMW ConnectedDrive Customer Portal (“My BMW ConnectedDrive”).
